**Pearl's completely new
all Maple shell drums
for the true working drummer
of today.**

Pearl's artist roster reads like a carefully compiled list of the top drummers in every type of music imaginable. From straight ahead Rock, Hard Rock and Alternative, to Funk, Jazz, Metal or World Music, Pearl drums offer today's drummer a blank canvas and the perfect tools from which to create a drum sound totally unique to their style of play.

No other drums available offer the versatility, character and tonal quality inherent to Pearl. The awesome sound associated with a Pearl Maple shell is a direct result of our patented Heat Compression Shell Molding System, or HC/SMS as it's known throughout the industry. This exclusive process produces the finest, most superb shell on the market today. Nothing else even comes close.

Session Custom SRX is the newest addition to Pearl's heritage of exclusive 100% Maple based drumsets. Its sound, and many of its features have been passed on from our exclusive Masters Series. Our design philosophy for SRX was simple. Masters Series drums have an unequalled reputation as the finest quality professional kit available. Our new Session Custom SRX hopes to place Masters Series quality, well within the affordable reach of every working drummer.

Session Custom offers an unbelievable set of exclusive features for this price range. Our top of the line OptiMount Suspension System represents a perfect example. OptiMount grips the drum by the tension rods, without touching the shell. This allows the shell to resonate completely unrestricted providing increased sustain, tonal depth and amazing presence. And features like our 2.3mm solid steel SuperHoop II rims, our all new 2 ply ProTone Heads, low-mass lugs, and beautiful highly polished lacquer finishes, all combine to create a kit that looks, sounds and performs far above kits costing twice as much. The configurations shown within this catalog could well be signature kits from some of our top artists. They represent the essence of our new Session Custom SRX. For a kit geared toward the working drummer, dependability and uncompromising performance for live work is a must, combined with the tonal sophistication and quality of sound needed for studio work. This is what SRX is all about...supreme quality drums, for true working drummers.

100% 6 ply Maple Shell

Pearl's exclusive Maple Shell is produced by our patented Heat Compression Shell Molding System. Its strength, tonal sophistication, and quality provide a perfectly balanced sound with an ultra-wide tuning range. This is the same process used to produce our Masters Series drums and is used by every Pearl artist throughout the world.

OptiMount Suspension System

Our OptiMount Suspension System mounts to the tom's tension rods and floats totally insulated on rubber cushions, providing the ultimate in stability while allowing the drum to resonate fully unrestricted. With OptiMount, the mounting hardware is completely removed from the drum shell providing a drastic improvement in resonance and sustain.

SuperHoop II

Our solid steel SuperHoop II rims help provide tonal flexibility for a wider range of tunings, and provide both strength and tuning integrity. This allows Session Custom SRX to offer a greater range of character perfect for any style of music.

Air Suspension Tom Legs

Our Air Suspension floor tom legs make a remarkable difference by counteracting the deadening effects of the floor. They add exceptional sustain while also enhancing tone, depth and resonance. Their design is simple yet ultimately effective, featuring a proprietary soft rubber compound in combination with an ingenious air hollow.

SP-30 Telescoping Spurs

All Session Custom SRX bass drums feature our SP-30 telescoping bass drum spurs. Designed for the professional drummer, the SP-30 spur is extremely quick to position, easy to adjust, and with its quarter turn spike to rubber tipped feet, it offers the absolute ultimate in stability on most any playing surface.

Pearl ProTone Heads

Matching Maple Bass Drum Hoops

Session Custom SRX bass drums feature 100% Maple hoops with matching exterior lacquer finish. Together with our die-cast claws and sleek drum key tension bolts, they provide supreme dependability, and the ultimate tuning integrity.

Uni-lock Tom Holders

Our TH-98 tom holders provide over 180 degrees of vertical adjustment and a full 360 degrees of horizontal movement for seemingly endless tom positioning options. Pearl's patented Uni-lock system has a super smooth continuous feel without preset gear positions and is locked using a standard drum key.

SRX925

Drums : SRX1622B, SRX1012T, SRX1113T, SRX1616F

#286 Cranberry Mist

Matching All Maple Snare Drum

The Snare Drum is the nucleus of a kit's sound. Session Custom SRX kits feature a matching 100% Maple Snare Drum to perfectly match the warmth, body, and tonal qualities offered by the Toms and Bass.

Super Professional Hardware

Pearl's hardware has long been considered the standard by which all others are judged. The hardware that accompanies every Session Custom SRX pre-packaged kit includes our extremely smooth H-855 Hi-Hat with swiveling leg tripod, our sturdy S-850 Snare Stand with Uni-lock basket adjustment, and what many consider the best cymbal stands available, our double braced C-855W and B-855W.

Revolutionary PowerShifter Pedal

PowerShifter is the most exciting bass drum pedal on the market today. Its features include a movable footboard to fine tune the action and feel, our patented Quad Beater with four different beater surfaces, silent chain drive, a roller cam hoop clamp system, our patented Uni-Pressure Spring Clamp, and a solid steel base plate, just to name a few.
