● SHORTBOARD

● LONGBOARD

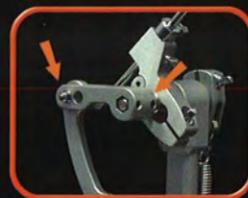

Adjustments to the Direct Link, Beater Stroke and Footboard will customize the pedal creating a perfect fit for any playing style.

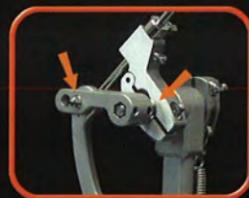

POSITION 1

OFFERS LIGHTER FEEL WITH ARTICULATE RESPONSE
DIRECT LINK POSITION L
BEATER STROKE POSITION A

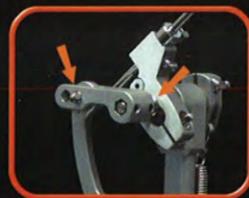

POSITION 2

OFFERS A LIGHT FEEL WITH INCREASED POWER
DIRECT LINK POSITION L A
BEATER STROKE POSITION B

POSITION 3

ADDS A HEAVIER FEEL BUT INCREASES FINESSE
DIRECT LINK POSITION H
BEATER STROKE POSITION A

POSITION 4

ADDS A HEAVIER FEEL WITH INCREASED POWER
DIRECT LINK POSITION H
BEATER STROKE POSITION B

THE FASTEST,
SMOOTHEST,
MOST VERSATILE
PEDAL IN THE WORLD.

DRIVE

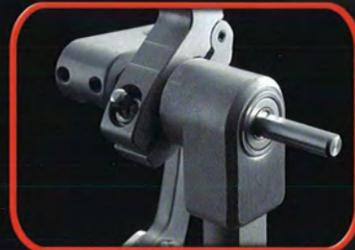

Pearl

Introducing Pearl's all new Eliminator Demon Drive.

A bass pedal system so advanced, so well engineered that it becomes an extension of your body. The secret to the speed are the Ninja bearings. Originally designed by fanatical skateboarding engineers, these highly specialized bearings utilize micro-polished steel balls for amazing speed with extremely low friction. The Demon Drive double pedal uses a total of 16 individual bearings for lightning fast response and unequalled power. The time from synapse to beat just got faster with Pearl's Demon Drive. Once you play it, you'll be possessed.

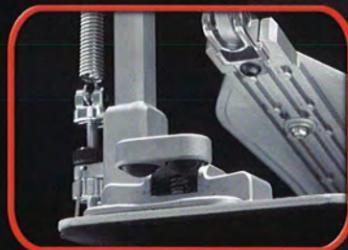

DIRECT LINK ADJUSTMENT
The 2 position direct link adjusts for a choice of light or heavy feel.

NINJA BEARINGS
Originally designed by skateboarding engineers these bearings feature micro-polished steel balls for amazing speed and low friction.

SPHERICAL BEARINGS
Self-aligning spherical bearings in the heel plate virtually eliminates friction.

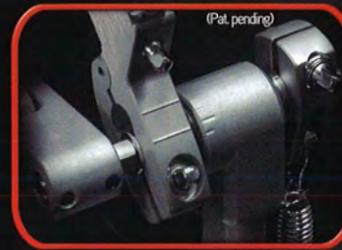

PIVOTING HOOP CLAMP
Spherical rubber grips allow raising or lowering of the bass drum while maintaining full pedal contact with the floor.

DUO-DECK LONGBOARD
The only pedal that converts quickly from shortboard to longboard. For your choice of feel.

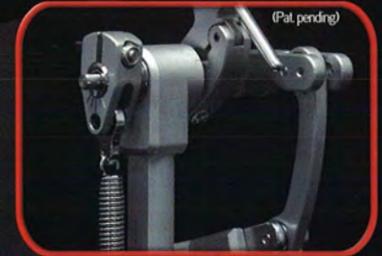

ZERO LATENCY U-JOINTS
Zero latency Z-Link U-joints prevent backlash and promote optimal feedback for incredible speed and control.

BEATER STROKE ADJUSTMENT
A choice of 2 positions for a finesse or power feel. Simply loosen the clamshell to change position.

CONTROL CORE BEATERS
The Demon Drive beater features a Control Core elastomer center that eliminates unwanted vibration.

FOOTBOARD HEIGHT ADJUSTMENT
Loosen the key bolt and rotate to desired footboard height. Rotation is clearly indexed for optimal repeatability.

CLICK LOCK SPRING TENSION
The Click Lock prevents the tension knob from loosening no matter how hard you play.

CONVERTS TO DOUBLE PEDAL
The Demondrive modular post design allows the conversion from a single to a double pedal or even a remote pedal with a simple add-on pack.
