BEARING EDGE

Masterworks offers a choice of five sonically tested edges - configurable by drum, application, and shell side.

STANDARD 45°
Provides the perfect blend of attack and warmth.

OUTER 60°
Pulls brighter overtones and increases punch.

INNER 45°
Edge apex focused to inner shell plies for controlled sustain.

ROUNDED 45°
Increased head-to-shell contact boosts mids and highs.

FULLY ROUNDED
Boosts mid-to-low range response and reduces decay.

THE SST Superior Shell Technology DIFFERENCE - *The Ultimate in Strength, Resonance, and Tone.*

To craft multi-ply, bonded drum shells with single-ply resonance and strength, Pearl pioneered the world's first high temperature hydraulic curing system. SST shells are formed in a bonded combination of cross-laminated 2-ply veneer panels then precision milled with overlapping scarf joint seams and cured with our exclusive AcoustiGlue at 1000 PSI of hydraulic pressure.

HARDWARE FINISH, LUG, AND HOOP OPTIONS

Reference —ONE—

The Reference Legacy... Unleashed.

A TRUE PEARL ORIGINAL, WITH A FRESH, GROOVE INSPIRING VIBE.

Where the Many Combine to Create a Singular Instrument.
Building on the modern hybrid drum concept Pearl originated with Reference Series, every element in the Reference One drum set's construction is fine-tuned to deliver optimal performance. By leveraging specific woods, shell thicknesses, and bearing edges exactly where they are most sonically beneficial within a drum set, Reference One's reduced-thickness EvenPly shells are fitted with MasterCast Die-Cast hoops, for a radical combination sustain and attack. Combined with Pearl's revolutionary R2 Air Tom Suspension System, Reference One takes the hybrid drum concept to new, unprecedented heights.

R2 AIR TOM SUSPENSION SYSTEM

Suspends each drum by four unique points for optimum tone and resonance at any angle. (U.S. Patent #11640814)

MASTERCAST HOOP

Escalates weight for tonal body and increases volume in high velocity play.

SINGLE SWIVEL LUGS

Single Swivel Lugs are self-aligning for better tuning integrity and reduced shell stress. Their reduced profile takes up less room on the shell face, delivering better tone from each drum.

GOLDEN RATIO VENTING

Cast air vents are uniquely placed using the Fibonacci Spiral on each component by size. This creates enhanced shell tonality and refined frequency response. (U.S. Patent # 7485791)

MASTERS SHELLS

Only the finest cuts of North American hardwood are harvested for Pearl's Masterworks Shell Vault. Cross laminated into dual-layered panels, each veneer in the Masters shell has been hand selected from this exclusive cache to produce drums worthy of Pearl's commitment to quality and performance.

SUPERIOR SHELL TECHNOLOGY

The SST method was developed to craft a multi-ply, bonded drumshell with single-ply resonance and strength. All shells are precision milled with overlapping scarf joint seams and cured with our exclusive AcoustiGlue at 1000 PSI of hydraulic pressure.

MAPLE

ALL MAPLE SHELL

Sonically Centered, Articulate, and Powerful.

A BOLD VOICE FOR HIGH VOLUME STAGE PROJECTION.

With a sound that sits in the tonal center of the mix, Masters Maple is Pearl's original 6-ply shell recipe. This timeless combination of a slightly thicker 6-ply North American Maple shell and a sharper 45-degree bearing edge produces enough precise projection to shake the rafters, yet is responsive to even the slightest stroke. With an equalized high/mid/low tonality, Masters Maple is primed for cutting, vibrant live performance.

STANDARD 45° BEARING EDGE
Pearl's orignal precision edge adds sustain through reduced shell-to-head contact.

MAPLE PURE

ALL MAPLE SHELL

Bridging the Gap Between Studio and Stage.

A POWERFUL TONAL BLEND OF RESONANCE AND ATTACK.

Pearl reimagines the original Masters shell recipe with Masters Maple Pure. Blending four layers of hand-curated North American Maple with 4-ply Re-Rings from our Masterworks Veneer Vault, its premium shell formula delivers a sonic fusion of near-field resonance and sharp top-end attack for varied pro environments. These hand-curated Maple plys increase the overall Janka hardness of the shell for increased projection, improved sustain, and better sonic output than ever before.

R2 AIR SUSPENSION SYSTEM

TOTALLY BALANCED, TONALLY UNITED, FLOATING TOM SUSPENSION

THE EVOLUTION OF TOM MOUNTING TAKES A GIANT LEAP FORWARD.

The physics of drum resonance is about to meet its match. For the first time, totally unrestricted, fully uninhibited, tonally uncolored sound can be drawn from mounted toms, with the Pearl R2 Air Tom Suspension system.
U.S. Patent #11640814

Elevate the Physics - and Sound - of Your Drum. R2 Air improves the overall tone of the complete drum kit by delivering the true sound of each mounted tom by creating a transition bridge from toms to floor toms.

ROCK SOLID, TOTALLY FLEXIBLE TOM POSITIONING.

Pearl is the first drum maker to offer a choice in tom mounting function. The GyroLock gearless positioning system offers the option of vertical placement with a 12.7mm solid L-arm, and the horizontal framing of our traditional 7/8˝tube mount. Both offer infinite angle adjustment with a simple turn of the key without compromising sound or security. Unlike other L-arm holders that rely on a limited position, fallible ball-in-socket system, GyroLock's internal locking system can secure any angle without parts that wear over time.

U.S. Patent #11640814

EXCLUSIVE FOUR-POINT FLOATING ISOLATION PLATFORM.
To attain tonally true sound, every drum would have to be mounted in a floating point at the center of its shell. R2 Air equally balances mounting pressure across two floating points at the top and bottom of each tom. This gives true tonal separation from mounting hardware and enhances sonic output. All mounting hardware is isolated from the shell via the R2 Air's four ResoDisk shock absorption inserts.

DamperDisk
Sustain and tone can even be fine-tuned with the addition of its included rubber DamperDisk in one of four tension points. This shortens decay for a more pronounced note.

MEMORY, WHERE YOU NEED IT MOST
GyroLock-L's position settings can be locked in place with the aid of additional memory locks in three separate places. This, plus our new Compass Dial markings, assure teardown and reset that is quick, secure, and repeatable. (US.PAT.11990109)

R2AIR ACCESSORIES

PIPE TO L-ROD CONVERSION ADAPTER

CPR1278

The CPR-1278 converts any 7/8" (22.2mm) diameter traditional Pearl tom receiver into a 12.7mm L-Rod tom holder. Simply insert the 7/8" horizontal end into a standard Pearl receiver and tighten the clamp, and enjoy the stability of vertical L-Rod tom positioning. This adapter allows the use of traditional pipe mounts while keeping the usability of newer L-rod tom holders from 9.5mm to 12.7mm. Its memory lock notch prevents slippage in play and holds toms securely in practically any position.

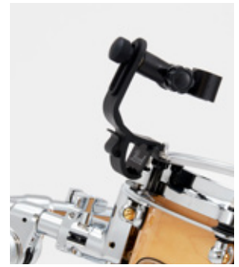

MIC CLIP ADAPTER

MICA1

Small, efficient, and secure, the MICA-1 Mic Clip Adapter is a strong solution for mounting your choice of microphone safely to Pearl MasterCast, SuperHoopII, and FatTone Hoop. Attaching to the top and bottom of the hoop with the simple turn of a drum key, the MICA-1 works with most any available mic clip to keep mics mounted in the optimum sonic space; even where a reduced footprint is an issue.
Designed specifically to work in tandem with Pearl's revolutionary R2Air Tom Mount, the MICA-1 allows for flexible microphone positioning to suit various performance needs and set-ups (microphone clip and microphone not included.)

MUSIC CITY CUSTOM

Solid Shell Snare Drums Handcrafted in the USA

HANDCRAFTED IN USA

DISCOVER THE SNARE DRUM YOU'VE BEEN WAITING FOR.

A singular tonal expression that elevates your approach to playing - and feeling - the drums.

Pearl's Music City Custom Solid Shell Snare Drums are uniquely refined, American made percussion instruments crafted with time honored precision. Using an old world technique derived from the shipbuilding trade, each solid shell is meticulously hand-formed from a steam treated plank of premium North American lumber.

Each Music City Custom Solid Shell Snare is then drilled with CNC precision before being hand finished and assembled by our Custom Shop team in Nashville, TN.

The natural beauty of each shell is further refined with a hand-rubbed oil finish available in a choice of standard Nashville Natural or with one of our exceptional, exotic inlay options. Pearl's Music City Custom Solid Shell Snare Drums are truly instruments elevated above all others.

Our handcrafted Solid Shell Snare Drums all feature Solid Maple Reinforcement Rings bonded to both top and bottom of the shell interior.

SOLID SHELL WOOD OPTIONS

SOLID MAPLE
The standard for premium, tonally centered midrange punch and restrained overtone.

SOLID CHERRY
Slightly brighter in tone than Maple with cutting projection. Best suited for a higher velocity stroke.

SOLID WALNUT
A fat growl with a naturally darker tone, the sound of Walnut is a perfect complement to its luxurious grain.

SOLID ASH
Brighter, louder, and with the crack of a homerun hit, the tonal quality of Ash is punchy with extended sustain.

SENSITONE HERITAGE ALLOY

Legendary Snare Tone from Studio to Stage

The Sensitone sound has always been drawn from an amalgamation of The Heritage Alloys (Aluminum, Black-over-Brass, and Steel) for the necessary, immediate tones of yesterday's chart toppers with an undeniably modern sensibility. Sensitone Heritage Alloy snare models employ these three original metal shell types to deliver essential tone and power with the right gig-ready touches.

DUOLUXE

THE WORLD'S FIRST INLAID BRASS SNARE DRUM

Pearl celebrates three-quarters of a century of iconic drum sounds with Duoluxe, a modern take our legendary Jupiter snare drum. This classic combination of a chrome-over-brass alloy shell and our trademark dual inverted shell beads is augmented with two finish bands of Nicotine White Marine Pearl inlay. This gives the shell a singular look and adds tonal nuance to its unbridled sound.

Bold and crisp with short midrange overtone.

STAVECRAFT

A startling addition to any pro drummer's soundscape, each StaveCraft shell starts from two layers of meticulously beveled solid wood staves. Dado-Loc, an old world principal exclusive to these snares, inserts a solid segment of contrasting wood into the center Dado channel formed by each stave. This solid fusion of hardwoods is lathed to a perfectly round 25mm thickness for unparalleled volume and power.

Peak high-end sonic dominance with lively overtone.

malletSTATION

Pearl introduces the ultimate mallet keyboard controller for teachers, players, students, and professionals. Practice, perform, compose anywhere.

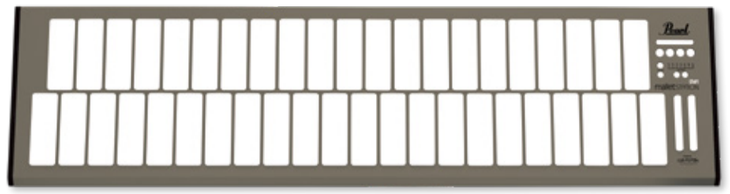

The World's First 3.0 Octave Adjustable Range Electronic Mallet Controller.

malletSTATION™

PLAY ANY INSTRUMENT THROUGH ANY DEVICE. ANY RANGE, ANYWHERE, ANYTIME.

The World's First 3.0 Octave Adjustable Range Electronic Mallet Controller. Powered By Cutting Edge Technology from Keith McMillen Instruments.

EM1 shown without Moveable Accidental "Gap Caps"

• 43, 1.75" x 5" soft silicone keys • 3 faders and 4 buttons, MIDI assignable • 3 MIDI assignable ¼" pedal inputs
• Bottom Note Range Shift up/down buttons • Octave up/down buttons • 1.6" H x 12.6" W x 49" L • 16.25 lbs

Pearl once again redefines the electronic percussion experience by introducing the revolutionary EM1 malletSTATION adjustable range electronic mallet controller.

The EM1 malletSTATION is a 3.0 octave adjustable range electronic mallet controller designed for all levels of player, from the beginning student through the gigging professional. The adjustable range function allows you to set the fundamental diatonic note of the instrument to what you need–low D xylophone? No problem! Powered exclusively by USB Bus Power, the malletSTATION is designed to be used with Mac, PC, iPad, iPhone, and Android devices, making it the first truly portable mallet percussion controller on the market.

Designed in collaboration with Keith McMillen Instruments, malletSTATION's tech-forward design features KMI's Smart Fabric Sensor technology allowing the silicone bar material to have an extremely sensitive, natural response, including mallet dampening and aftertouch control, and all can be easily tailored to your individual playing style. The EM1 features a master control section, with 3 programmable faders, 4 programmable buttons, and the fixed function low note and octave shift buttons. In addition, three assignable pedal inputs allow for flexibility in performance such as sustain, expression, or any MIDI parameter of your choice. These controls are fully programmable through a software editor so changing your configuration is as easy as clicking a mouse.

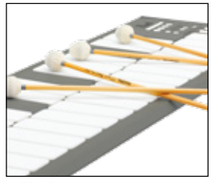

This is the controller that will grow with you throughout your playing career–from music apps on your phone or tablet, to professional digital audio workstations and sound libraries–your sounds and even the instruments you play are only limited by the software you run.

PRACTICE, PERFORM, COMPOSE ANYWHERE.

THE EXPANDABLE, PREMIUM QUALITY, PROFESSIONAL ELECTRONIC MALLET INSTRUMENT OF YOUR DREAMS.

One EMC 2.0 Control Module and Three EMX 1.0 Octave Expansion Modules creating a full 5.0 Octave EM PRO Mallet Instrument.

Introducing malletSTATION EM PRO. The expandable, premium quality professional electronic mallet instrument that is ready to take your creativity to places never before possible. Not just an evolution of the original malletSTATION, but a complete departure in purposeful design. Whereas malletSTATION EM1 was designed to be light, portable, and USB-powered for the ultimate go-anywhere mallet controller, EM PRO is all about raw power, ultimate performance, and expandability. EM PRO is built around two separate components that work seamlessly together, allowing you to design the professional performance instrument of your dreams.

The EM PRO platform is comprised of two main components: the EMC Control Unit, and EMX Expansion Unit. The 2.0 octave EMC Control Unit can be used on its own as a compact controller with all the features and functions needed to craft your sound and performance. The EMX expansion octaves can be added to the EMC to create a 3, 4, or 5-octave performance-ready controller that meets the demands of today's music and beyond.

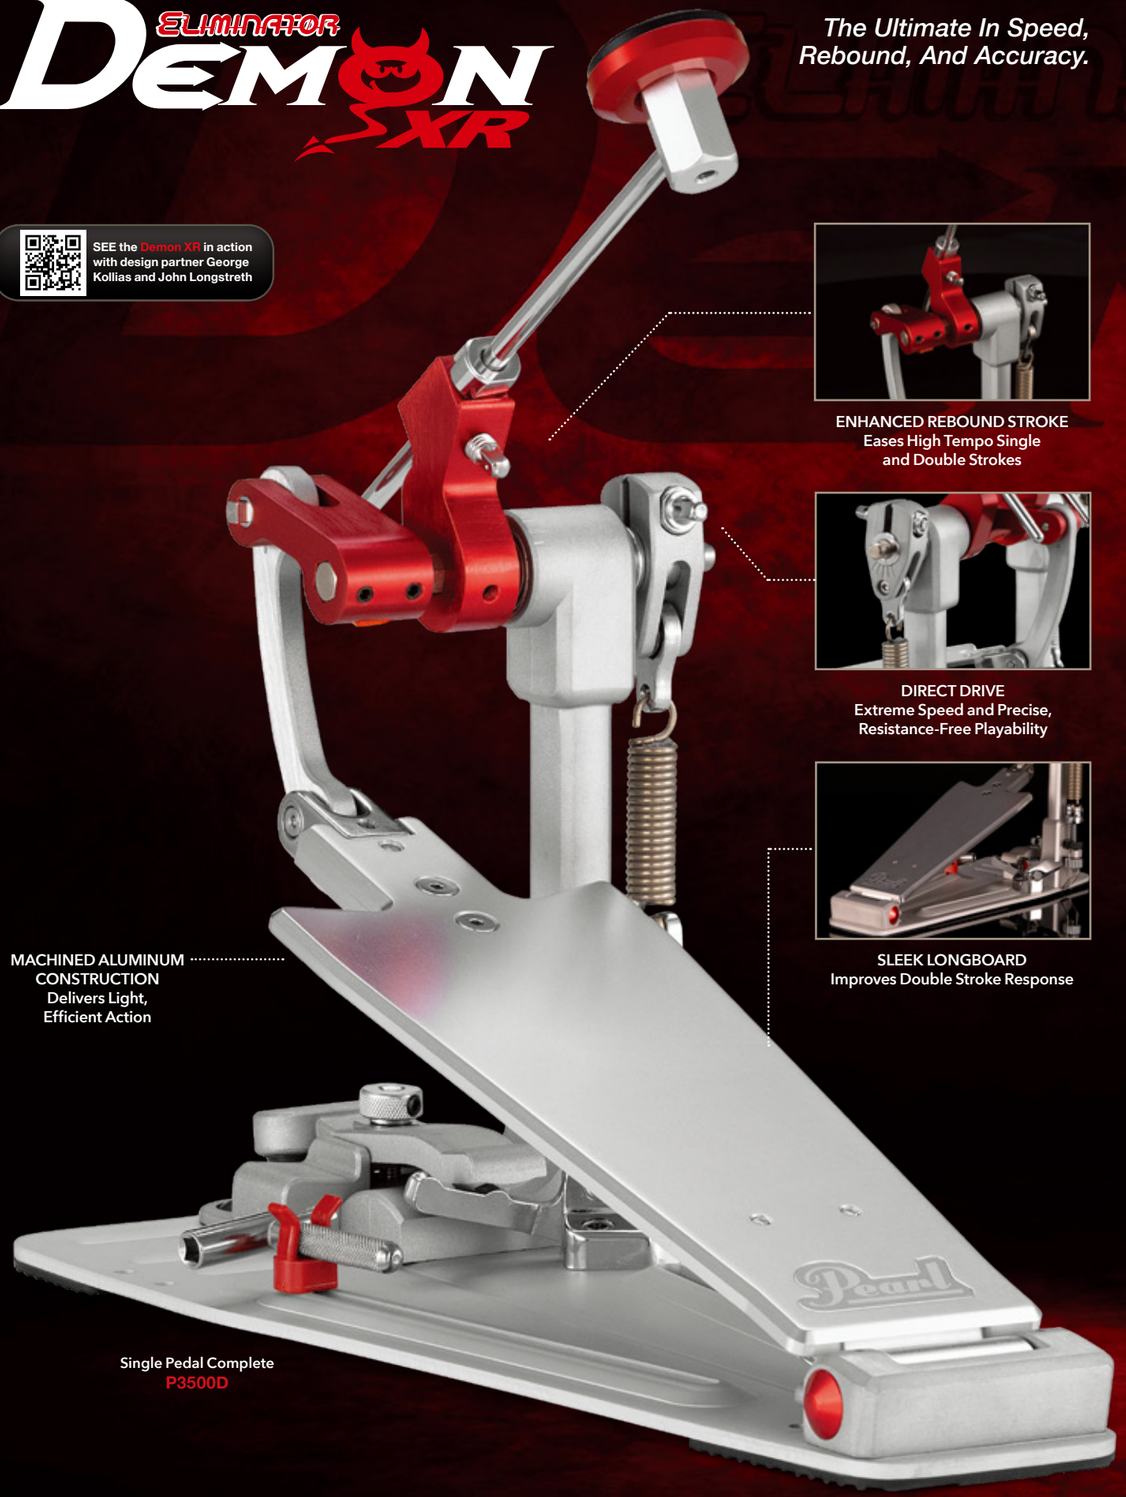

The 2.0 Octave EMC control unit utilizes a modern 32-bit multi-processor architecture, offering a quantum leap in speed and power over EM1 resulting in increased bar precision, accuracy, and extended dynamic range. EM PRO features industry-leading Muse Kinetics Technology, a full-color, multi-line screen for navigation, programmable backlit touch-sensitive buttons and control sliders, both USB and 5-pin MIDI connectivity. The EMSC Sound Card option is a user installed Quad-Core ARM 64-bit 2.0GHz processor sound card enabling complete freedom from a computer tether during live performance featuring high-fidelity instrument recordings from Soundiron.

The EMX Expansion Unit brings creativity and individuality to EM PRO. Simply remove the end cap of the Control Unit and slide on one, two, or three EMX Expansion units to create a 3, 4, or a complete 5-octave professional mallet instrument. Units seamlessly lock together, and the inner aluminum frame structure creates a secure, precise, and rock-solid playing surface. Each expansion Unit also features an additional dedicated onboard processor, so adding multiple expansion units never impacts core performance.

REDLINE YOUR PERFORMANCE

The world's only pedal featuring the Patented Interchangeable Cam System, Eliminator: Redline's virtually unlimited tunability lets you lock in personally tuned feel, power, and speed. Like having four pedals in one, Redline pushes the boundaries of bass drum performance by fusing the power and flexibility of Pearl's original Eliminator with the fluid speed of our Demon series pedals.

CHAIN OR BELT DRIVE

**Shown w/ Optional Red Cam*

The sprocketless double chain drive on the Eliminator Redline (P2050C) provides super smooth action with powerful and precise feel. The Eliminator Belt Drive model (P2050B) provides a very comfortable, natural feel similar to a direct-drive system.

POWERSHIFTER FUNCTION
By moving the foot board forward or back, our revolutionary PowerShifter function provides 3 positions to fine tune the power and feel of the pedal. Instantly change the drive angle leverage to create a light, regular, or strong feel.

ZERO PLAY HINGE
Our proprietary stainless steel hinge provides maximum freedom of motion for blazing speed and prevents play between the footboard and heel.

NiNjA BEARINGS Developed by skateboarding engineers for the ultimate in fast, quiet performance, NiNjA Bearings incorporate state of the art micropolished steel balls for incredibly fast and smooth performance.

ROLLER CAM HOOP CLAMP
Mount Adjustment. Quickly adapts to a wide range of hoop thicknesses for the smoothest, most secure grip possible. Easy side access to the hoop clamp makes set up and tear down a breeze.

INDEPENDENT TRACTION GRIPS
Eliminator Redline's redesigned pedalboard features Pearl's exclusive reversible Traction Plate insert, allowing individual traction grip configuration to suit your exact playing requirements.

THE CONTROL CORE QUADBEATER
Provides four beater surfaces (two hard plastic, two felt) with the added feel of the vibration-free Control Core elastomer center. U.S. Patent #7626108

CLICK-LOCK SPRING ADJUSTMENT
w/ NEW Rotor Tension Cradle. Secures spring tension in high impact play. The counter spring adjustment's rolling cradle allows the spring to pivot with each stroke for less resistance. (U.S. Patent #7754953)

UNI-LOCK BEATER ANGLE CAM
Grips the axle a full 360 degrees, allowing infinite beater angle adjustments. Floating Spring Pendulum design is perfectly centered on the clamp for full bearing movement and maximum smoothness.

ELIMIN8R

EIGHT CORE PERFORMANCE ELEMENTS - BUILT AROUND THE WAY THAT YOU PLAY.

The “8” in Elimin8R represents eight essential performance fundamentals that define the pedal’s complete playing experience. From speed and power to response, versatility, and reliability, every element is engineered to work together as one connected system.

Rather than focusing on a single feature, Elimin8R delivers a customizable feel built around the way drummers actually play, perform, and connect with their pedal.

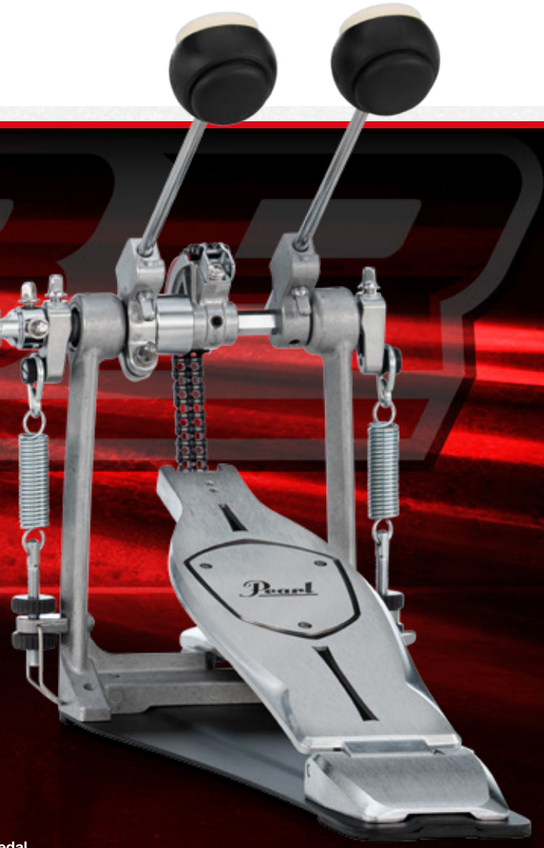

The 8R's unique Removable Cam System offers two options for action and feel: the accelerated push of the Progressive Cam or the trusted velocity of the Round Linear Action Cam.

Other Pearl standards include a resistance-free footboard for direct and accurate response, a side hoop clamp, and a three-position Powershifter function for added fine-tuning.

8 CORE PERFORMANCE ELEMENTS:

FOCUS

Three-position PowerShifter: Adjust the footboard angle for a totally personalized feel.

SPEED

Strategic design maintains a smooth, efficient motion throughout the footboard stroke.

IMPACT

Control Core DuoBeater offers two different contact surfaces to fine-tune attack: plastic and felt.

RESPONSE

Precision-engineered components translate foot motion into consistent and accurate strikes.

POWER

The double-chain drive delivers a stable energy transfer directly from your foot to the drum head.

SECURITY

Click-Lock keeps spring tension set. Side Access Hoop Clamp keeps you firmly connected.

VERSATILITY

Removable Cam System gives a choice of Linear/Round (no Cam) or Radical Progressive (Red) action.

RELIABILITY

A durability-focused build and Pearl's unbeatable warranty promise have you covered.

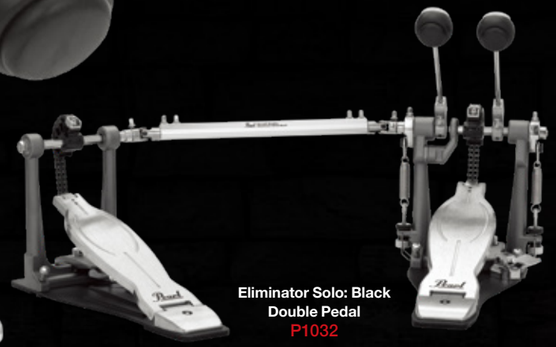

ELIMINATOR SOLO

Singular Feel, Eliminator Speed, Priced to Perform. Fly Solo and Set Your Feet Free!

ELIMINATOR SOLO : BLACK

Delivering blinding speed and powerful performance, Eliminator Solo bass drum pedals put the fleet footed player in control with all the gliding velocity that made Pearl pedals revolutionary. These no nonsense, streamlined Eliminator models deliver singular, resistance free feel for effortless play and driving performance.

The Solo: Black pedal's even, slightly weighted feel delivers just the right amount of resistance without slowing your stroke - for increased power and less muscle fatigue.

REVERSIBLE FELT / FOAM CYMBAL WASHERS allow four-way control of cymbal "ring" by mixing and matching the "hard" and "soft" surfaces of the washers.

THE TRIDENT TRIPOD uses a full 360° of clamping force via the hinged collar. The inner tube rests in a nylon bushing to prevent metal to metal contact. Heavy duty legs feature lateral bracing for superior ultra quiet rigidity.

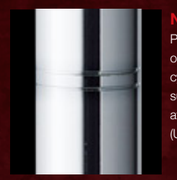

REVERSIBLE CUP WASHER w/ O-RING
Specially designed to "float" normally or "lock" to prevent noise during recording.

WINGLOC
Quick Release Wing Nut Secure, adjustable, spring loaded cymbal nuts for quick set up and tear down.

NODAL POINT MARKINGS
Pearl's BC2030 features markings on the telescopic tubes that allow cymbals to achieve better clarity and sustain when the tubes are positioned at their respective Nodal Points. (U.S. Patent #9070348)

GYROLOCK TILTERS are infinitely adjustable and provide 360 degree range of motion for precise positioning with one-step convenience.

SIGNATURE SERIES

The Pros Play Pearl!

BOBBY ALLENDE

Bobby Allende is a mainstay in the New York Latin Music Scene and he demands the best from his drums, that's why he plays Pearl. His Signature drums are fiberglass with no seams to inhibit vibration which allow the drums to resonate freely for the full, rich sound that Bobby is famous for. The congas are 28 inches tall, fitting the traditional seated player perfectly while adding extra width to the base for added projection and stability. A matching set of bongos is also available.

The Bobby Allende congas and bongos feature Remo Fiberskyn 3 heads for tuning stability and Pearl's Low-Rider crowns with a radical sloping edge that practically disappears under your hands for comfort you have to experience to believe.

If you demand excellence like Bobby, check out his Signature Fiberglass Congas and Bongos.

JESUS DIAZ

Cuban born Jesus Diaz is one of the most in-demand and well-respected world percussionists and vocalists on the scene today and his series of congas and bongos is designed to the critical specifications of a true master conguero. To start, the Thai Oak drums measure 30" tall which is idea for the seated player as well as double or single conga stand mounting options. Next, the slightly more rotund belly and added inner lining of fiberglass allows all the drums to project and cut through even the largest ensembles. A simple, yet elegant, Quick Release tension lug is slotted to allow easy removal of heads without fully removing the nut which complements the Contour Crown rim for pain-free slap tones on the longest of sessions. However, the true jewel of this set is the 14" Super Tumba! This larger-than-most tumba will offer additional lower frequency possibilities and expanded tuning ranges for the complete conga set. Lastly, exclusively designed by Jesus himself, the Deep Blue and Coral Red Stripes is an eye-catching and stunningly rich lacquer finish topped off with the hand-select premium natural buffalo heads.

TRAVEL

Congas, Bongos, & Timbales

Where can you take the Pearl Travel Congas and Bongos? The answer is anywhere you can take traditional drums but without any of the hassle. The Travel Congas feature a 3.5" deep wood shell with stave construction and Remo Symmetry heads. Available in three sizes: 11" x 3.5", 11.75" x 3.5" and 12.5" x 3.5" each with five precision Allen bolts. The 7" and 8.5" Travel Bongos feature 3.5" Thai Oak shells with Remo Fiberskyn heads and three point tuning. The Travel Congas and Bongos include a foam-handle tuning wrench.

The Pearl Travel Timbales feature 14" and 15" steel shells that are professional size in diameter but only 4" deep.

The drums are connected by a hinge that marries them to the Quick Release stand. The custom hinge allows the drums to be folded together into the size of one standard depth timbale for easy storage and transportation.

The Travel Timbales come with and a single braced stand that includes an 11.25" adjustable accessory post with 6 positions that allow cowbells and blocks to be placed the perfect distance from the player.

The steel shells feature a black lacquer finish and USA Remo clear Ambassadors heads for a truly professional sounding instrument. A soft carrying case for the stand is also included (sold separately).

DJEM-BASS

The **PJBS350** Djem-Bass Attachment allows you to convert any Pearl 14" djembe into a sub-sonic bass drum. To reduce the attack and add greater "lows," we have included a cloth cap that stretches around the head. For smoother low-end with a slightly reduced attack, slip the included neoprene disc inside, allowing for two distinct sound options. A pedal (not included) attaches via an I.S.S. clamp to the djembe's stand mounting plate. Includes two legs with mounting hardware, pedal bracket, head cover and neoprene muffler.

FOLKLORIC ELITE CONGAS

Pearl's Folkloric line of congas feature a traditional look with modern innovation that only Pearl can deliver. Each 28" tall Oak drum is designed for the "seated" player, but includes stand mounts for players who prefer to stand. Thicker South American-style natural skin heads make the drums warm-sounding, but a fiberglass gel coating on the interior seals the shell and add the projection and volume desired by today's players. Four Polished Steel Reinforcing Bands are inset on the shell for a smooth touch, and the traditional hoops complete these stunning Cuban instruments.

FOLKLORIC BATA DRUM

Bata drums originated in Nigeria over 500 years ago and were primarily used for religious purposes. The drums were introduced into Cuba by slaves in the 1820's. Pearl Batas are modeled after an ancient Cuban design and feature naturally finished 100% Thai Oak shells for outstanding and authentic tone. Polished steel traditional rims offer excellent tuning integrity and ease of tuning. These prized ceremonial drums have an hourglass shape and produce a great, warm tone similar to a bongo-like sound on the high drum and a djembe-like tone on the large drum.

HANDPANS

A Cosmic Blend of Sound

MELODIC HANDPAN

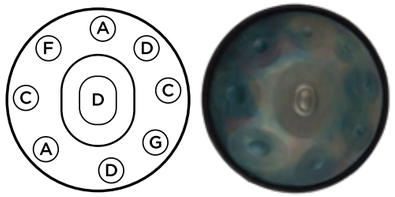

22″ Melodic Handpan
9 Note D Minor - **Patina Finish**
PBHP500

Handpans are musical instruments that are a subset of the steelpan. The beautiful tonal characteristics will remind you of steel drums, but handpans are only played by hand, with no sticks or mallets, so the sound has reduced attack but is much more mellow.

The shape of Pearl's 22" Awakening Series Melodic and Euphonic handpans feature a center tone field surrounded by eight tone fields. Each tone field has a fundamental note, an octave, and an overtone, so each field has three notes. The hand-crafted steel construction of the instrument is designed so each tone field holds its tuning.

The Melodic handpan features a patina finish and is meticulously tuned to the D Minor scale, and responds to your finger strikes with excellent sonority.

HAND PERCUSSION

A World of Hand Percussion

BLOCKS, BELLS, SHAKERS and more. Choose from a complete selection of hand percussion instruments to add color and impact to your music.

Natural Gourd Guiro
PNG20

Two scraping surfaces: thin grooves on one side for a lighter sound and thicker cut channels on the other side for a beefier sound. The interior is coated with a figerglass get to add projection and volume.

Metal Guiro
PMG20

Perfect for Merengue rhythms, or just a different metallic sound texture, Pearl's Metal Guiro will become an essential ingredient in your "toy" bag. Scraper included.

Fiberglass Guiro
PFG20

Pearl's Fiber Guiro is light-weight and provides optimal projection due to its fiberglass construction. With the included striker and two different playing surfaces you have a world of sonic possibilities in your hand.

Guiro Holder
PGH20

This innovative design will hold virtually any size guiro secure for one handed playing. Easily mountable off the lug of your conga or any 3/8" post, Pearl's Guiro Holder uses a track system to lock the guiro in place. Included is a 3/8" "Z" rod so you can also mount your favorite accessory as well.

Beaded Maracas
PFM20

The Beaded Maracas feature Shekere-style beads which offer an excellent sound with greater control, and foam handles for enhanced comfort.

Maracabasa
PFM50

The Maracabasa is two great instruments in one, combining the functionality of a maraca and a cabasa in one handheld instrument. Featuring a ribbed fiberglass body wrapped in shekere-style beads.

Basket Ganza 9˝X 4˝
PGA20

The Pearl basket ganza is a 9"x4" woven tube containing wooden sticks instead of conventional shot. The wood sticks produce an airy percussion sound.

Shakelets
PWR40

This innovative percussion item feature exclusive "Ganzinellas", Brazilian-style plantinellas combined with ganza shakers that are worn on the wrists to produce a shaker sound when playing.

SUSPENSION SYSTEM

R2 AIR

To attain tonally true sound, every drum would have to be mounted in a floating point at the center of its shell. **R2 Air** equally balances mounting pressure across two floating points at the top and bottom of each tom. This gives true tonal separation from mounting hardware and enhances sonic output. ***U.S. Patent #11640814***

SUSPENSION SYSTEM

OPTIMOUNT

Our **OptiMount** Suspension System attaches to the tom's tension rods and floats on rubber cushions, providing the ultimate in stability while allowing the drum to resonate fully without restriction.

OPT1516	for drums 15˝~16˝ deep, 8˝~16˝ diameter

I.S.S MOUNT

Pearl's Integrated Suspension System (ISS) Mounts clamp directly to each drum's hoop to provide the quickest, easiest mounting system available (US PAT: 5544561). Two mount variations exist to accommodate different hoop thickness. The **ISS****** models support 1.6mm hoops and feature a BT300 bracket while the **IS******SL/C models support 2mm hoops and boast a beefier BT3 bracket.
