

PEARL DRUM RACK SYSTEM

DR-80

Instruction Manual

Congratulations on your purchase of the Pearl DR-80 Drum Rack.
Please read this Instruction Manual carefully so that you can get the maximum performance from your DR-80 Drum Rack.

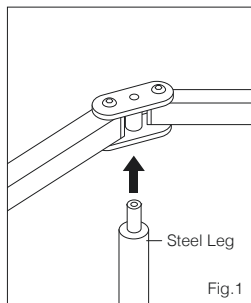

Components

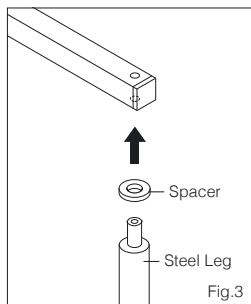

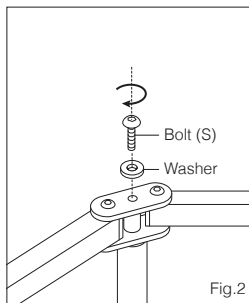

- Straight Bar / 38x38x900mm (x3)
- Joint Assembly (x2)
 - Upper Link Plate w/Leg Bracket
 - Lower Link Plate w/Nuts
 - Bolt (S) w/Washer (M10 x 25mm) x 2
- Steel Leg w/Bolt, Washer (38.1x706mm) --- (x4)
 - Bolt (S) w/Washer (M10 x 25mm) x 2
 - Spacer x 2
- PC-08 Pipe Clamp (x4)
- Hexagonal Wrench (x1)

Assembling the DR-80

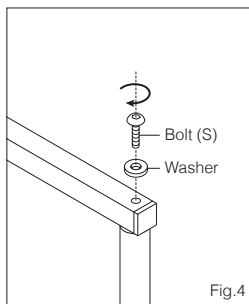

The square tubes are connected to each other at factory. They should be mounted on the legs as illustrated. Please use the hexagonal wrench for tightening the bolts.

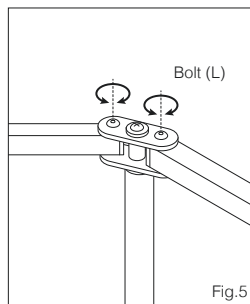

1: Insert the top of leg into the leg bracket of the joint assembly and tighten the Bolt (S)/ M10x25. (Fig. 1, 2)

2: Insert the Top of Leg through spacer into the joint hole located underneath the Bar. (Fig.3)

3: Screw in Bolt (S)/M10x25 through washer into the top of leg. (Fig.4)

4: You can adjust the angle of both of the bars with the bolts. When the angle is set, tighten the bolts again. (Fig.5)
