The Choice of Champions.

A Legend on the Field
No other Snare drum has changed the face of corps competition like the FFX Championship Series. The lethal combination of 6 plies of 100% Maple free-floating in a super lightweight aircraft Aluminum frame creates a force to be reckoned with on the field. Available in 13” and 14” sizes.

FFX-1412/A
in #94 Candy Apple

#26 Brushed Silver
#33 Midnight Black
#46 Pure White
#92 Aurora Blue
#94 Candy Apple

Features
- 6 ply 100% Maple Shell
- Free-Floating Design
- Lightweight Aircraft Aluminum Frame
- Aluminum Alloy Edge Ring and Hoops to Withstand the Highest Tensions
- Individually tunable snares
- Quick Release Strainer Allows Fast Head changes
- 6 Acoustically Located Air Vents
- 3 Year Warranty on Shells
- 1 Year Warranty on All Hardware
- Rod Guards Prevent Accidental Loss of Tension rods during Quick Head Changes

Sound Reinforcement
The 2 ply Maple reinforcement rings provide solid shell stability and shape integrity. This in turn promotes optimal head seating and consistent tuning, so crank em down and tune em up. The FFX will take it. 16 Strand Synthetic Gut Snares offer a tremendous advantage over the competition by offering a larger contact area with the bottom head. This in turn provides increased sensitivity at lower playing levels and dramatic power as volume increases. The individual strands are also removable, offering the widest tuning range of any drum on the market.
Snare Control

The FFX offers unparalleled tuning control by allowing the fine tuning of each individual synthetic gut snare. The oversized adjustment knob allows complete control over the vertical placement of the entire snare unit in the snare bed. Solid steel guards offer protection when sitting.

FEATURES

- Free-Floating Design Strainer Mounts to Tension Rods with No Shell Contact
- Lightweight Aircraft Aluminum Frame
- Individually Tunable Snares
- Quick Release Strainer Allows Fast Head Changes

Lightning Fast

The large easy-grip handle provides intuitive access without having to search. It’s super fast and most of all quiet. The large one knob release allows the entire assembly to be disengaged for quick head replacement without nuts and washers to keep up with.

FEATURES

- Free-Floating Design Throw-Off Eliminates Shell Contact
- Extremely Quiet On/Off Operation
- Stainless Steel guards offer protection to Throw-off Assembly
- Oversize Precision Milled Knobs are Smooth and Exact
- Large One Knob Release Allows Entire Snare Assembly to Drop for Quick Head Changes

Special Order High Gloss Lacquer Finishes

- #109 Arctic White
- #110 Sequoia Red
- #122 Black Mist
- #125 Teal Blue
- #126 Emerald Mist
- #160 Silver Sparkle
- #165 Diamond Burst

Championship Toms
Setting the Tone.

The Fills That Thrill
6 ply 100% Maple shells is what you get in Pearl’s Championship Series Marching Toms. The perfect compliment to our FFX snare drums. 2.3mm Steel SuperHoop II rims are anchored in place by high strength 6 mm case-hardened tension bolts. Lightweight Aluminum lug casings provide extreme strength and evenly disperse head pressure when aggressively tuned. All sets include 40 mm Aluminum spacers between drums for even weight dispersion and playable positioning for improved playability.

Features
- 6 ply 100% Maple Shell
- 2 ply Maple Reinforcement Rings
- Fully Rounded Bearing Edges for Optimum Tone
- Features Pearl’s Sonic Cut for Optimal Volume and Projection
- 2.3 mm Solid Steel SuperHoop II Rims
- Rubber Tom Trim for Shell Protection
- 10 Pre-Configured Sets
- 6 mm Case Hardened Tension Bolts
- Available in 5 Covered Finishes
- 3 Year Shell Warranty
- 1 Year Hardware
- Available in 8 High Gloss Lacquer Finishes* - Special order only

Inner Strength
Our Tom shells feature a 2 ply 100% Maple reinforcement ring that adds tremendous strength to the 6 ply Maple shell. This allows maximum shell resonance while providing structural integrity as the tuning goes up.

The Place for Bass

The very core of your Corps. Bass. It’s the sound that drives the competition experience. To project those low frequencies you need big volumes of air moving. And with Pearl’s seismic air chambers that’s exactly what you get, Bass that you and your audience can feel. 6 ply 100% Maple shells offer maximum resonance and huge sub-frequency projection. To compliment the Maple shells 2” wide 6 ply Maple Hoops are secured by extra wide claws that provide an evenly dispersed grip for consistent tuning. Lightweight high strength Aluminum casings and 6 mm case hardened tension bolts provide uncompromising strength while still keeping you light on your feet.

FEATURES

- 6 ply 100% Maple Shell
- 2” wide 6 ply Maple Hoops for Optimal Tuning Consistency and Durability
- Remo Smooth White Ambassador® Heads with Logo
- Die-Cast Aluminum Alloy Casings
- Oversized Triple Reinforced Claws
- Available in 5 Standard Covered Finishes
- High Gloss Black Hoops for Classic Style
- 6 Acoustically located Air Vents
- 10 Unique Sizes
- 6 mm Case-Hardened Tension Bolts
- 3 Year Shell Warranty
- 1 Year Hardware
- Available in 8 High Gloss Lacquer Finishes* - Special order only

PBD-1614 in #26 Brushed Silver
Championship Carbonply
A Sumptuous Sonic Sandwich of Power.

A Sonic Beast

Only Carbon Fiber can take your Corps or band to the next level. Speed, agility and power are a must in today’s highly competitive environment and with Pearl’s Championship Carbonply family you have everything working in your favor to put your group in the Winner’s Circle. The FFXC features 6 plies of exotic African Mahogany sandwiched between an inner and outer ply of Carbon Fiber. This distinctive combination creates a sonic hybrid beast of a snare drum that promotes a perfect balance between the low frequency of African Mahogany and the exuberant mid to high range tendencies of Carbon Fiber for an aural blend unlike anything that you have ever experienced.

A Sonic Beast

A Sumptuous Sonic Sandwich of Power.

FFXC-1412/A

FEATURES

• 6 ply African Mahogany with Inner and Outer Carbon Fiber Layers
• 2 ply Reinforcement rings
• Advanced Hybrid Blend of Materials Creates Optimum Tone
• Superior Volume
• Robust Wide Tonal Spectrum
• Carbon Fiber Adds Strength to Shell
• Available in 13” and 14” Sizes
• Standard Lacquer Finish #301 Carbon Fiber Matte
• 3 Year Warranty on Shell
• 1 Year Warranty on Hardware
Our Championship Series Carbon Ply Toms provide a battery of sonic assault. The shell composition of 6 ply African Mahogany encapsulated in an inner and outer ply of Carbon Fiber promotes amazing projection and aggressive volume. These Quads and Quints offer the perfect complimentary balance of sound to our Carbonply Snare Drums. Available in a choice of 6 pre configured packages to fit perfectly in your Corps. These advanced materials provide cutting edge technology to offer an acoustic advantage to those who dare.

**FEATURES**

- Advanced Hybrid Blend of Materials Creates Optimum Tone
- Superior Volume and Projection
- Robust Wide Tonal Spectrum
- An Aural and Ocular Experience
- Carbon Fiber Adds Strength to Shell
- Standard Lacquer Finish
- #301 Carbon Fiber Matte
- 3 Year Warranty on Shell
- 1 Year Warranty on Hardware

Our Championship Series Carbonply Bass Drums offer up Bass technology like you have never experienced. 6 plies of Maple formed then covered in an inner and outer layer of Carbon Fiber. Space age technology merges with 60 years of drum-making craftsmanship to form the ultimate high volume, low frequency generator. Available in 10 sizes.

</tbody>
</table>
Don’t let the size fool you. This is one potent competitor. These smaller sized 6 ply Maple Snare Drums offer amazing response due to the reduced interior shell volume. Excited air molecules moving within the confines of a reduced interior provide dramatic attack without overtones that muddy the sound in an indoor venue. Nothing but crisp articulate crack. The inherently lighter weight of these drums make them perfect for high mobility events. Available in 2 standard covered finishes.
*Special order finishes available.

**FEATURES**

- 6 ply Maple Shells for Strength, Projection and Richness of Sound
- Smaller Shell Interiors Provides Extreme focus with Minimal Overtone
- Light Weight Provides Increased Mobility
- Aluminum Alloy Edge Ring and Rims
- Includes Same High Durability Hardware & Strainer as Standard Championship Series

ArticuLite Bass Drums feature 6 ply Maple shells in an extra shallow depth that offers powerful bass with tight focus and crisp response. The 12˝ depth allows faster transference of energy from head to shell to audience. The bass frequencies remain tight and articulate. Perfect for the hard reflective surfaces of small venues and indoor arenas. 6 acoustically placed air vents allow quick exit of air for for unsurpassed playing response and added projection. 2˝ wide 6 py Maple hoops provides increase strength and durability.

**FEATURES**

- 6 ply Maple Shells for Strength, Projection and Richness of Sound
- Shallow Shell Interiors Provides Extreme focus with Minimal Overtones
- Light Weight Provides Increased Mobility
- Aluminum Alloy Edge Ring and Rims
- Angle Cut Bearing Edges Enhance Resonance for Superb Tone
ArticuLite Marching Toms are designed to complement the FFXS Snare Drums. The shallow shell design provides tight focus while reducing overall mass for fast moving high energy performances. Maple Shells deliver rich, robust sound while the rounded bearing edges deliver that distinctive Pearl sound. Redesigned case-hardened Aluminum tension casings offers improved tuning accuracy and even dispersion of tension while 6 mm case hardened tension bolts permit the highest tensionings without failure. Available in 6 packaged sets.

Power. To Go

The sounds, the uniforms, everything in Drum Corps generates excitement. Now you can even take that level of excitement and individuality to the drums. Custom powdercoated finishes allow complete color coordination with your Corps and really sets you apart from all the other plain Jane metal finishes. Everything in your favor. From custom lacquer finishes to powdercoated hardware, Pearl offers everything to set your group apart on the field. Beautiful, yet durable, powdercoated finishes gives your drums major visual impact and will last for season after season. Allow 6-8 weeks for delivery.

The Big Finish.
A Sound Competitor

The newly redesigned Competitor Series offers big value at affordable prices. The CMSX snare drum offers many of the features of the FFX Series snares such as a free-floating shell with an aluminum edge ring that relieves all batter head tension from the 8 ply shell. Case hardened tension rods evenly disperse head tension for precise and consistent tuning. The bottom hoop features a built in snare guard for protection. The synthetic gut snares offer dynamic sensitivity and are controlled via the lever-activated strainer. Available in #33 Pure White.

FEATURES

- 8 ply Mahogany Shells
- Lightweight Construction
- 2.3 mm Solid Steel Hoops
- Light Weight Promotes Increased Mobility
- Available in 13” and 14” Sizes
- Aluminum Edge Ring Relieves Shell Tension
- Ultra Sensitive 12 Strand Synthetic Snares

CMS-1311/C
(only 10.2 lbs)

High Performance and Value

The CMS snare drums are available in 2 sizes 14” x 12” and 13” x 11”. These drums feature 8 ply Mahogany construction with chrome-plated zinc tension casings for even tuning at extreme tensions. The lever operated strainer offers fast and reliable on/off control. These drums offer extreme value combined with super lightweight construction. The CMS-1311 is the lightest marching snare available at only 10.2 lbs. Available in #33 Pure White.

FEATURES

- 8 ply Mahogany Shells
- Lever Action Strainer
- Lightweight Construction
- Light Weight Promotes Increased Mobility
- Ultra Sensitive Synthetic 12 Strand Snares

CMSX-1412/C
**Competitor Series**

Value-Packed Competitor.

Robust Tone

Redesigned for even greater sound these new Tenors offer extreme value and performance to put your Corps in the Winner’s Circle. 8 ply Mahogany shells feature a rounded bearing edge for robust tone. Pearl’s sonic cut on the shell bottoms project that big sound right to your audience. The lightweight zinc lug casings provide precise even tuning by keeping those super rigid steel hoops firmly planted to the shells. The bottoms of the shells are protected by rubber Tom Trim and lightweight aluminum Tom spacers keep positioning perfect.

Available in #33 Pure White.

**Features**

- 8 ply Mahogany Shells
- Aluminum Tom Spacers
- Fully Rounded Bearing Edges
- Pearl’s Sonic Cut for Amazing Projection
- Includes Rubber Tom Trim for Shell Protection
- Lightweight promotes Increased Mobility
- Chromed Zinc Lug Casings
- Steel Hoops
- 3 Packages Available

Big Sound at a Big Value

Our Competitor Series bass drums offer tremendous value and performance. 8 ply Mahogany shells featuring 6 strategically placed air vents make these drums highly efficient low frequency projectors. 6 ply Maple hoops provide a rigid mount for the triple-reinforced claws that anchor securely to our zinc lug casings.

Available in 8 sizes.

**Features**

- 8 ply Mahogany Shells
- 6 ply High-Gloss Black Maple Hoops for a Classic Finish
- 6 Acoustically Located Air Vents
- Lightweight for Increased Mobility
- Chromed Zinc Lug Casings
- 8 Sizes Available
Technology Meets Tradition

The FFXP-1412 features a full free-floating shell formed with Pearl's HC/sms and a precision cut snare bed for the ultimate in snare response. Available in 4 ply Maple or Birch, both feature 4 ply reinforcement rings and a high strength Aluminum edge ring for added strength. The high strength lightweight aircraft aluminum frame offers extreme durability under the most aggressive tunings. Pearl's Quick-Release Snare System allows the removal of the entire unit with the turn of a knob for super easy head changes. The upper snare unit uses a 28 strand chrome-plated carbon steel snare that features exterior adjustability over tension and head contact via a standard drum key. Chrome plated snare guards provide a safe sitting platform and offer protection if dropped. Available in 5 high-gloss lacquer finishes.

FEATURES

- 4 ply Maple Shells with 4 ply Reinforcement Rings for Optimum Tone
- Birch Shell Available (Special order only)
- Pearl Finalist Kevlar® Head
- Steel Snare Guards for Extra Protection
- Chrome Snare Wires Increase Brightness
- Aluminum Edge Ring Relieves Shell Tension
- Exterior Access to Top Snare Adjustment
- 45 Degree Bearing Edge for a Great Cutting Sound

Standard

- 4 ply Maple Shells with 4 ply Maple Reinforcement Ring
- Die Cast Lugs
- High-Gloss UV Lacquer
- 2.3 mm SuperHoop II
- Available in 3 Sizes

Tenors That Really Sing

The perfectly matched compliment to our FFXP Snare Drums. These shells feature 4 ply Maple with 6 ply Maple hoops and new aluminum tube lugs for better tone and lighter weight. The case-hardened tension rods provide consistent head tensioning and the top and bottom heads are independently adjustable. Available in 4 sizes for a wide range of voicings.

Special Order

- 4 ply Maple Shells with 6 ply Maple Hoops
- Die Cast Rubber Lined Claws
- Independent Head Adjustment
- Aluminum Tube Lug
- Available in 4 Sizes

Special Order Only

- 4 ply Maple Shells with 4 ply Maple Reinforcement Ring
- 1.5˝ 6 ply Maple Hoops
- Available in 3 Sizes
- Angle-Cut Bearing Edges
- Oversized Triple Reinforcement Claws
- Designed To Compliment Our Entire Pipe Band Series
- High Gloss UV Lacquer Finishes
Bass That Will Blow Your Kilt Up

These drums offer huge low frequencies with resounding warmth. The 4 ply Maple shells with 1.5” Maple hoops have aluminum tube lugs for maximum resonance and reduced weight. These drums are scientifically engineered to provide the ultimate in bass response.

Standard

- 4 ply Maple Shells with 4 ply Maple Reinforcement Ring
- 1.5” 6 ply Maple Hoops
- Available in 3 Sizes
- Angle-Cut Bearing Edges
- Oversized Triple Reinforcement Claws
- Designed To Compliment Our Entire Pipe Band Series
- High Gloss UV Lacquer Finishes

Special Order

- 4 ply Maple Shells with 6 ply Maple Hoops
- Available in 5 Sizes
- Aluminum Tube Lugs
- Die Cast Rubber-Lined Claws
- Designed To Compliment Our Entire Pipe Band Series
- High Gloss UV Lacquer Finishes
- 6 Acoustically Placed Air Vents
Monoposto™
The bass carrier of tomorrow is here today.

MAY Monoposto™ Bass Carrier
The most technologically advanced Bass carrier available today. All instrument weight is evenly distributed through the innovative three point system that creates a unity of one between drum and carrier, allowing unparalleled freedom of movement. The freedom to express yourself.

FEATURES
- Allows instant adjustment and positioning of Bass drum
- Amazing range of instrument adjustment for pinpoint playing positioning
- Extreme range of elevation adjustment for players and drums of all sizes
- Precision bent magnesium shoulders provide optimal comfort and extreme lightweight durability
- Inflatable MAY Comfort Air System allows even greater custom tailored fit
- MAY lock nut and attachment hook anchors the Bass drum to the carrier eliminating any unwanted instrument movement
- Monoposto hardware and seat for supporting bass drum integrates Stadium Hardware technology

Locking hooks eliminate side to side movement to prevent noise and increase mobility.

Aircraft aluminum MAY tubular structure creates rigid track for the mounting brackets to slide, rotate with silk-like ease and lock securely with a twist of the wrist.

Bass drum support pad is invertible to fit any size Bass drum and conforms naturally to any radius.

The freedom to move.

Ultra-light Polycarbonate abdomen plate is completely free-floating. It transfers minimal torque weight from the instrument, thereby increasing comfort.
Engineering from the future. Folds to half its normal size for ease of transportation and space-saving storage.

MAY Contour Hinge™ Carrier

The revolutionary Contour Hinge™ offers a level of adjustability never before possible. Space age composites and advanced alloys merge seamlessly to follow the subtle lines of the human form. Art and engineering combine in one perfect purpose-built form.

FEATURES

- Allows independent adjustment to conform to both the upper and lower torso of the player
- Locks precisely in place with a single tension bolt
- Super flexible structure retains the high strength of all MAY Tubular carriers
- Contour Hinge is designed to allow the retrofit of all Championship May carriers
- Inflatable MAY Comfort Air System with adjustable backbar allows for ultimate custom tailored fit

A Rigid Platform

The May® tubular frame offers complete structural rigidity to hold the entire weight of the instrument. Minimal weight and torque is transferred to the player through the Polycarbonate abdomen plate.
One size truly fits all.

The MAY Magnesium Shoulder profile offers outstanding lightweight comfort and a custom fit. Fully rotating magnesium shoulders allow angle adjustment of the carrier for a form-fitting comfort. New dual tube rod clamps transfer all torque load to the aluminum tubes to distribute the load evenly throughout the carrier frame. Polycarbonate abdomen plate carries minimal load. Comfort Core® cushions disperse weight evenly and absorb shock from intense movement.

Simply loosen one tension bolt per side and the magnesium shoulders pivot easily on the aluminum tubes for angle adjustment of your carrier for an even more personalized fit.

Our tilting FFSA Free Floating Snare attachments mount securely to the tension rod connecting tubes of the drum without any shell contact to allow quick mounting and removal of your snare drum. Available in Aluminum or Magnesium which is approximately 40% lighter.

Magnesium shoulders are padded for optimal comfort and allow anterior adjustment inward and outward to fit any player regardless of size.

Magnesium back bar slides together or apart for posterior adjustment. Set it to your size and lock it for a truly personal fit. MAY Comfort Core Cushions line the back bar for superior comfort and weight distribution.

May Tubular carriers allow an amazing range of adjustment for height to accommodate players of all ages, shapes and sizes.
Championship Magnesium

• RM-MVTQ Quad/Quint Carrier features MAY Advanced Variable Positioning System that allows easy adjustment to the Tenor Rail from close to away
• RM-MVTB features independently adjustable J-Rods and top hooks on sliding tracks

FEAT URES

RM-MVTB
Magnesium Bass Drum Carrier

RM-MVTQ
Flip-up Quad/Quint/Sextet Carrier

Adaptable Tubular Tenor Rail
This adjustable tubular tenor rail retrofits to all Championship carriers and provides easy on/off access, full tilting ability and maximum adjustability for perfect tom placement.

Advanced Variable Distance Positioning System
MAY AVDP system allows perfect alignment to set your preferred playing line. Each tom also has the ability to swivel inward or outward for pin-point positioning and optimal instrument placement. Nothing compares to this level of control.
MAY aluminum tube carriers offer super lightweight design with great adjustability. These carriers feature a smaller, contoured aluminum abdomen plate instead of Polycarbonate found on the Championship Magnesium. The lightweight highly padded aluminum shoulder supports rotate fully for optimal fit sans the adjustable back bar found on the Championship series.

**Features**

- Lightweight aluminum abdomen plate provides form fitting comfort and even weight distribution for optimal mobility
- Aluminum shoulder supports offer full rotation adjustability
- Full height adjustability for torso and perfect instrument placement
- Adjustable back bar is available separately

- RM-ALTS Snare Carrier
- RM-ALTQ features MAY Variable Distance Positioning System that allows the drums to be moved from close to away.
- RM-ALTQ Flip-up Quad/Quint/Sextet Carrier
MAY Competitor T-Bar Carriers

- CSC-1 are designed to accept our Competitor Series Marching snares. Lightweight, easy on, easy off.

- CBC-1 Bass carriers offer a perfect fit for our Competitor Series Bass drums.

Competitor Series tom carriers are available in 3 configurations. The tenor rail separates quickly for easy fit in cases.
- CTC-3S - 8”, 10”, & 12”
- CTC-3M - 10”, 12”, & 13”
- CQC-4 - 8”, 10”, 12”, & 13”

Pipe Band Carriers

Pipe carriers by MAY offer the state-of-the-art in lightweight marching performance. Form fitting comfort that hugs your body like a second skin and allows unencumbered freedom of movement.

- MPC-1 features adjustable back bar, magnesium shoulder supports with Comfort Core® cushions and magnesium free-floating flip-up snare attachment.

- EAPC-1 features Aluminum shoulder supports and an Aluminum Free-Floating Flip-up snare attachment.

Quick Release Tenor Rail

The Competitor Series tenor rail separates quickly for easy transportation or storage in any case.

- CH-5S-Carry Hook mounts securely to the FFXP edge ring.

LR-30 Leg Rest

Lightweight support for FFXP.

Flip up Quad/Quint Carrier. Variable Distance Positioning. Compatible with all J-Rod carriers

Assorted J-Rods
A variety of J-Rods to fit virtually any application.

RMMVT21S J-Rod for Snare Carrier

RMMVT21TL J-Rod for Tenor Carrier

RMMVT21BL J-Rod for Bass Carrier

DDPTMB Set of 3

Pivoting Tubular Mounting Brackets for Magnesium Backbar

The fully adjustable back-bar allows the shoulder supports to slide inward or outward to fit a wide range of players. This also allows the mounting of the Comfort Core Cushion or the May inflatable Comfort Air.

May Accessories
MCC-1
Comfort Core Cushions
Inflatable MAY Comfort Air
RM-RTH
Contour Hinge w/ Tubes
PDCH-Custom Fit Case for Contour Hinge Carrier

These removable air chambers allow complete adjustability over firmness for increased comfort. Simply insert one end of the hand pump to inflate and flip it to the opposite end to decrease pressure.

Optimum Air Ride Adjustability

Retro-Fit Contour Hinge
Allows retro-fit of existing tube carriers to Contour Hinge technology. Bring the latest technology to your carrier without the cost of a full carrier.

Protection For Your Contour Hinge Carriers
The custom molded case protects your Contour Hinge carrier during storage or transit. Complete with locking strap and carrying handle. 4 Unique indentions at each corner facilitates stacking of multiple cases securely.

All MAY carriers are covered under various US Patents including but not restricted to 6,323,407, 6,329,983 B1, 5,691,492, 6,028,257, 6,028,290 B1, 6,403,869 B2, 6,770,805 B2, and 6,881,886 B2. Plus other US and foreign patents pending.

Retro-Fit Contour Hinge

The Cushion of Foam
Comfort Core Cushion attach with Velcro straps to the carrier shoulder support or back bar for super weight distribution.

Randall May International Inc.

MAY Stadium Hardware™ offers a complete system of hardware designed to function in the stands or on the field. Constructed from super lightweight ribbed aluminum extrusions, Stadium Hardware™ provides perfect angle sets, a low center of gravity and dependable high strength.

Features

- Offers extremely fast setup and tear down
- Light weight Aerospace Aluminum construction allows easy transportation
- Legs moves to allow extreme angle adjustments and compensates for uneven playing environments
- Rounded rubber feet provide sure footing in stadium bleachers or on flat surface
- Large locking collars offer easy access
- Solid locks for instrument rock solid height/angle positioning
- Stainless Steel fasteners offer high strength and resistance to rust

- RM-SHS-P snare stand accepts the FFSA snare attachment for drop-on mounting and super quick removal. A built-in snare stabilizer prevents any metal to metal contact and stops lateral movement of the drum.
Snare Stabilizer
A sliding, locking, plastic bumper that accommodates any size snare and prevents movement and metal clicking.

Locking Tube Joint
High strength locking collars slide precisely on the ribbed extruded tubes and lock with precision authority.

Fast Snare Attachment
Snare Stand accepts a portion of the FFSA attachment. Simply drop it in place and the weight of the instrument keeps it firmly in place.

Get into the Groove
The deep grooves of the ribbed aluminum extrusions create a track for the leg support to slide effortlessly up and down then lock into place for bleacher application.

Optimal Traction Control
The newly designed rounded rubber feet offer traction on virtually any even or uneven surface. From the parking lot to the stands your instrument stays put.

Advanced Tripod Technology
At the heart of the Stadium Hardware is the patented ATS (Advance Tripod System) that allows the leg to adjust to any surface. Each leg is supported by double braced support struts that prevent lateral movement. The large rubber feet provide “Mountain Goat” traction on almost any surface.
MAY Stadium Hardware™

MAY Stadium Hardware™ offers a complete system of hardware designed to function in the stands or on the field. Constructed from super lightweight ribbed aluminum extrusions, Stadium Hardware™ provides perfect angle sets, a low center of gravity and dependable high strength.
Stadium Hardware
At home in the stands or in the field.

Drop and Lock Technology
Drop and lock technology allows gravity to do all the work. Simply set the tenor rail down in the angled cradle and the weight of the tenor drums locks into position. Perfect playing height, no lateral movement and super fast accessibility.

• RM-SHB-P
  Bass drum stand features a sturdy drum corps style cradle to hold any size drum securely on any surface.

• RM-SHC-S
  Cymbal Docking Station accommodates up to three MCH-1 Cymbal Holder Units for Pep Band or stadium performances. (MCH-1 not included)
Hardware

Pearl’s Advanced Hardware is packed with features to make every aspect of your playing experience better. From oversized rubber feet for super stability to the ergonomically designed adjustment knobs, everything in your favor to perform.

**S-1000**
- Accepts Drums From 12”-14” Diameter

- Compatible With J-Rod Based Rail Systems

VC-52N
Adapts MQC-4 Aluminum Quad Carriers to fit MTS-1000/2000 Tom Stands

S-1000/S-1000L features large rubber feet for optimal stability on any terrain.

Gear Tilter provides perfect angle settings and solid locks. Large steel mounts allow quick, intuitive on and off action.
Accessories
Enhance your Gear

Protect your investment on the field with genuine Pearl covers. Made from washable fabric with padded interiors for the ultimate in custom fit and protection for your instruments rain or shine.

• SP-1B 14” Sound Projector with Velcro tape mounting

• SP-1 14” Sound Projector with Velcro tape mounting

Protect your equipment while in transit or long term storage with Pearl cases. Custom molded for an exact fit with a heavy duty carrying handle.

- TS-14 Bass Drum Tone Strips
  Self adhesive and mounts directly to the bass head for easy muffling
**Accessories**

**Performance Special FX**

**MUH-20**
This specialized clamp mounts to the tension posts of your drum to accept a world of percussion opportunities. Any accessory that can be mounted on a 3/8˝ post can be added for effects.

**K-030**
High tension tuning key with super leverage via its easy grip handle.

**KGT-00**
The most ergonomically friendly drum key that you will ever use. Spins freely and has interchangeable color inserts. Complete with quick release strap.

**MSB-2**
Double stick bag with Velcro mounting. Nylon construction.

**MMB-1**
Mallet holder with Velcro straps for marching tenors.

**MSB-1**
Nylon construction with Velcro mounting single bag.

**BMH-1**
Set of 2 mallet holders with tape for Bass Drum mount. Holds 2 pair of mallets.

**MUH-10**
Multi use holder for cymbals or Bells. Mounts to drum rim.

**BDR-1**
Bass Drum Rim Shooter. Protects your Bass hoops from damage and provides an increase in click volume.

**PGB-10**
Gock Block Holder. Cushy foam handle absorbs vibrations and prevents hand fatigue. Ergonomic design makes it easy to strike and hold.

**MSB-2**
Double stick bag with Velcro mounting. Nylon construction.

**MUH-10**
Multi use holder for cymbals or Bells. Mounts to drum rim.

**K-050**
Our standard tuning key. Small enough to keep virtually anywhere.
Replacement Parts

CO-55AL
High Strength Lug casing for Marching Tenors

C-072 AL
Low Mass Bass Lug. Fits all Championship Series.

ME-262NA
Stainless Steel Snare Guard Fits all FFX Series

S14MPA
Lever Action Throwoff Assembly for CMS/CMSX Snare Drums
REPLACEMENT SNARES

S-505TC /FFXP1412
Top 28 strand snares for Pipe Snare Drum batter head snare assembly. High Grade Carbon Steel with Chrome finish for increased brightness.

S-505T /FFXP1412
Top 24 strand snares for Pipe Snare Drum batter head snare assembly. Thinner snare wires.

S-505S /FFXP1412
Bottom replacement snares for Pipe Snare Drum.

GS-416A /FFX Series
16 strand Gut replacement snares for 14˝ FFX

GS-142 /Competitor
Replacement synthetic snares for 14˝ CMS/CMSX. Plastic ties included.

EB-1 Eye Bolt
Allows proper mounting of Bass Drums to carriers. Fits all sizes. 2 required.

D-042 Triple Reinforced Bass Claw
Ultimate dispersion of clamping force for Bass Hoops. Promotes precise, even head tuning. Fits Championship and Competitor Series.

REPLACEMENT BASS HEADS

A complete selection of Bass Drum Heads are available to fit every size and series. Smooth White, Ebony, Fiberskyn and Nuskyn by Remo® simulate the warmth of natural calf heads without the maintenance. From 14˝ to 40˝

REPLACEMENT SNARE & TOM HEADS

Pinstripe heads feature a built-in muffling ring to prevent overtone.
CT heads are 10 mil polyester for high tension Toms.
WA heads are coated 10 mil polyester for Concert and Marching.
CC heads are 10 mil with a 5mil center dot and Aluminum collar for high tension use.
ST is the snare side companion to the CC.
Black Max & White Max batter heads combine woven Aramid fiber with Mylar for a softer feel.
Falam K. Batter heads are 2 plys of polyester with a center ply of Kevlar® for high strength.
Finalist is the ultimate high strength Kevlar® head designed to withstand the stress of Pipe Band tunings.
Pearl is proud to offer our Philharmonic Concert Snare Drums, featuring the revolutionary Triad Silent Strainer System. These incredible drums represent state of the art design and craftsmanship, combined with groundbreaking innovation allowing the player unprecedented control over the tone, dynamics and performance of the instrument. A proprietary combination of three unique snare sets, using both graduated and even tensioning, offers seamless timbral overlapping and ultra-smooth dynamic transition, plus a greatly extended dynamic and sensitivity range. The new Triad Silent Strainer provides three individual tension adjusters allowing you to fine tune the optimum tension for each type of snare material, and a single global adjuster is used for overall tension. All snares can be effortlessly changed by simply loosening the adjuster and one drum key rod.

**FEATURES**

- Triad Silent Strainer System
- Tube Lugs
- Graduated Tension Snares
- Remo Renaissance Heads
- Vintage Style Snare Bed
- Extremely Wide Dynamic Range
- 3 Shell Options

3 Thumbscrew Tension Adjusters allow easy access to individual snare strand tuning or adjust them all simultaneously via the large precision global tuning knob.

**PHM-1465**

14” x 6.5” Solid Maple Shell
Die Cast Hoops
Also available in 14” x 5” and a choice of 2 finishes, #103 Piano Black or #204 High Gloss Walnut Bordeaux

7.5 mm solid Maple shell provides the fullest, darkest and warmest timbre

Snappy Wire- Wet timbre with articulate sensitivity
Uncoated Stainless- Even tension bright and very saturated
Graduated Tension- smooth dynamic transition similar to gut

The vintage style snare bed provides every nuance of your performance by promoting perfect snare to head contact
Philharmonic Series Snare Drums

It’s All About Choices.

3 mm Aluminum offers superior cut and brightness with intense volume.

34

6 ply Maple provides powerful volume with the warmth that is inherent to Maple.

Phitamic Field Drums

All the emotion of vintage Civil War drums but with complete tuning ease. These drums feature 6 ply Maple shells with SuperHoop II Steel rims, vintage style tube lugs and our Triad Silent Strainer System. Available in 2 sizes, 14”x 12” or 16”x16” in a choice of finishes, #103 Piano Black or #101 High Gloss Walnut.
Symphonic Series Snare Drums provide a highly versatile instrument to the modern performer. Developed exclusively for the concert hall these drums feature shell construction of 6 ply Maple in a choice of 2 shell depths, 6.5” and 5.5”. The heart and soul of these drums is the proprietary Multi-Timbre Snare Strainer System that functions as 3 individually controlled throw-offs. This feature allows individual control over tension and positioning of each snare strand material, gut, cable or wire. Classic Tube lugs, Stainless Steel Tension bolts and Pearl’s solid Steel Die Cast Hoops provide uncompromising tuning integrity for the Renaissance Diplomat heads. Available in #138 Antique Sunburst Finish.

**Features**

- Multi Timbre Snare Strainer allows individual control over each snare strand
- 3 Snare Materials: Gut, Cable and Wire
- Die Cast Steel Hoops
- Remo Renaissance Diplomat Heads
- 6 Ply 7.5mm Maple Shell
- 2 Sizes, 14” x 6.5” and 14” x 5.5”
- Classic Antique Sunburst Finish

**Features**

- Multi Timbre Snare Strainer allows individual control over each snare strand
- 3 Snare Materials: Gut, Cable and Wire
- Die Cast Steel Hoops
- Remo Renaissance Diplomat Heads
- 6 Ply 7.5mm Maple Shell
- 2 Sizes, 14” x 6.5” and 14” x 5.5”
- Classic Antique Sunburst Finish

**A Symphony Awaits**

Symphonic Series Snare Drums provide a highly versatile instrument to the modern performer. Developed exclusively for the concert hall these drums feature shell construction of 6 ply Maple in a choice of 2 shell depths, 6.5” and 5.5”. The heart and soul of these drums is the proprietary Multi-Timbre Snare Strainer System that functions as 3 individually controlled throw-offs. This feature allows individual control over tension and positioning of each snare strand material, gut, cable or wire. Classic Tube lugs, Stainless Steel Tension bolts and Pearl’s solid Steel Die Cast Hoops provide uncompromising tuning integrity for the Renaissance Diplomat heads. Available in #138 Antique Sunburst Finish.

**A Unique Trio**

The Multi Timbre Snare Strainer provides quick access to each of the 3 separately adjustable throw-offs. Each lever controls 6 strands of gut, cable or wire. Complete snare tension adjustment is fine tunable via the 3 individual knobs for a vast range of aural coloring.
Concert Series Snare Drums

Pearl’s Concert Snare Drums are packed with high end features at a price that makes them an outstanding value. Available in 2 sizes, these drums offer many of the features of our flagship models but at a cost any drummer can afford. These contenders feature 6 ply all Maple construction, Tube lugs, SuperHoop IIs and Pearl’s time proven SR-017 strainer that utilizes 7 strands of thin Yellow cable and 7 strand Stainless Steel cable.

Sound Value

Pearl’s Concert Snare Drums are packed with high end features at a price that makes them an outstanding value. Available in 2 sizes, these drums offer many of the features of our flagship models but at a cost any drummer can afford. These contenders feature 6 ply all Maple construction, Tube lugs, SuperHoop IIs and Pearl’s time proven SR-017 strainer that utilizes 7 strands of thin Yellow cable and 7 strand Stainless Steel cable.

Features

- 6 ply Maple Shell Construction
- Vintage Tube Lugs
- SR-017 Strainer
- 2 Snare Materials, 7 Strand Thin Yellow, 7 Strand Stainless Steel Cable

Articulate Midrange Power

Pearl’s Philharmonic Concert Toms offer the ultimate in uncompromising sound and craftsmanship with their 4 ply 100% African Mahogany shell construction. The Symphonic Series provide many of the same features as our Philharmonic line but incorporate 6 ply Maple shells. Both Series are available as single or double-headed versions. The single head version uses our I.S.S. mounting system while the double headed Toms use our state-of-the-art Optimount System.
Concert Toms

1.6 mm Steel rims combined with low mass lugs extend shell resonance and provide accurate fine tuning.

T800W double Tom stand uses our sturdy TH-88S Tom arms and the highly versatile gear tilter.

Pearl’s Concert Series Concert Toms offer a wide range of tuning and performance possibilities, suiting percussionists from the concert hall to the outdoor stadium. Superb tone and excellent projection can be achieved from our 7 ply 100% Mahogany shells and extended depth. Our newly redesigned low mass tension lugs and 1.6mm Steel Hoop extends shell resonance and offers accurate fine tuning. Each tom is supported by its own independently adjustable tom arm offering limitless positioning possibilities. Included with each pair of toms is our sturdy T800W double tom stand. Pearl Concert Series toms are available in pairs and are finished in a prestigious Midnight Black #46 covering. Current available sets: 6x8/8x8, 10x10/12x10, 13x11/14x12, and 15x14/16x14.

Features
- 7 ply Mahogany Shells
- 1.6 mm Steel Rims
- Available in 4 Sets or 8 individual sizes
- Sets include T800W Double Tom Stand
- Finished in #46 Midnight Black Covering
Philharmonic Bass Drums

A Higher Level of Bass
Philharmonic Concert Bass Drums offer unprecedented bass response. The 4 ply African Mahogany shells provide a deep warm resonance unlike any other shell material. The highly responsive shells are supplemented by 4 ply Maple reinforcement rings for structural integrity. 2˝ Maple hoops provide a rigid foundation for our Silent Tensioning System that utilizes very low mass lugs with 12 ergonomically designed tuning keys featuring 8 mm Handle bolts for optimal leverage and tuning ease. This series of bass drums feature the Remo Fiberskyn® heads formed from a single ply 10 mil Mylar film. These super durable heads are designed to promote a dark, warm sound with extended sustain. Available in 4 sizes and finished in #210 Matte Walnut Lacquer.

Features
- 4 ply African Mahogany
- Remo Fiberskyn Ill ® Heads
- Silent Tension System
- Low Mass Lugs
- 12 8mm Handle Bolts
- Available in 4 Sizes 28˝x14”, 32˝x16” 36˝x16”, 36˝x18”

Symphonic Bass
The Symphonic Series Concert Bass Drums provide many of the same features as our Philharmonic Series such as our Silent Tension System and Fiberskyn Ill ® heads. 6 ply Maple shell construction provides solid, resounding bass with a slightly shorter decay than Mahogany. The 2˝ Maple hoops offer consistent tuning via the 10 triple reinforced flanges secured to the lightweight aaluminum casings.

Features
- 6 ply Maple
- Remo Nuskyn® Heads
- Silent Tension System
- Low Mass Lugs
- 10 Triple Flange Lugs
- #201 Matte Walnut Finish
- Available in 7 Sizes 28˝x14”, 32˝x16” 32˝x18”, 36˝x16” 36˝x18” 36˝x20” 36˝x26”

Functional Form
Pearl Roadster Thrones are designed to be ergonomically correct and provide support and comfort for extended performances. The D-2000TC Timpani/Conductor’s Throne has a Dual-Zone cushion, sturdy footrest and adjustable back rest while the D-1000T features a round cushion. Both offer superior height and maximum adjustability.

- Super Quiet Double Strut legs
- Solid 4 leg Design
- Over-Sized Rubber Feet
- Dependable Clam Shell Clamp

Cymbals At the Ready
The C-1000SC Goose Neck Cymbal Stand allows the suspension of any cymbal ready for striking. The stand adjusts for height and has single braced legs for light weight. The C-1000AC Orchestral Cymbal Cradle holds 2 cymbals at the ready for quick access. Rubber coated cradles maintain quiet during retrieval and replacement.

Advances in Hardware
Pearl’s Advanced Hardware offers positioning possibilities never before attainable. The GyroLock Tilter used on the 2000 Series allows a complete 360 degree range of movement for infinite adjustability. The 1000 Series uses our super dependable UniLock Tilter. All Advanced Hardware provide sure-footed, noise-free operation for years of service.
Start With Pearl Quality

The perfect start to a career in percussion begins with high quality instruments. Pearl Educational Kits contain superior components that are fast and easy to assemble and store away in their own custom made carrying cases for ease of transport.

Symphonic Series Chimes

Adams Symphonic Series Chimes feature Chrome plated 1.5” Brass alloy tubes. Available in three models, the BK-3003CF 1-1/2 Octave with Field Frame, the BK-3003C 1-1/2 Octave and the BK-3000C 1/2 Octave Chime set. The standard series Chime Rack features 2 way locking casters and an extremely smooth pedal dampening system.

- 1.5” Proprietary Chrome Plated Brass Alloy Tubes
- Aluminum Construction
- Height Adjustable Frame
- Locking Casters
- Pedal Dampening System
- Full Length Cover Included

Go Mobile

Endurance Field Frame Add-on Base (#213) fits all Adams Chimes and allows transportation of Chime Rack over virtually any terrain.
Marimba & Glock

Marimba To Go

Adams Concert Series Marimbas utilize Zelon synthetic bars for uncompromising tone and projection while providing extreme durability and resistance to the harsh elements of an outdoor performance. The Endurance Field Frame provides this instrument with a “go anywhere” swagger that makes transportation on and off the field a dream.

- Synthetic Zelon Bars Offer Superior Resistance to Elements
- Structurally Welded Resonators Prevent Mechanical Noises
- Frame System Offers Crank Height Adjustment to Fit All Players
- Endurance Field Frame Conquers Virtually Any Terrain

Classic American Sound

The new Adams Artist and Concert Series Round Top Parsifal Bells are made of high quality steel that have been custom formulated especially for Adams. The bells exactly match the specifications of the “round top Deagan Parsifal bells” which many international musicians feel set the standard for quality and sound. Adams has designed the new bells with the right timbre, resonance and tone that match the characteristics of the 1920s American sound.

Sound Mobility

The CV-1F (with motor) and CV-2F (no motor) Concert Vibraphones feature precision graduated Adams Aluminum alloy, Nickel anodized bars. These Vibraphones produce a beautiful tone of unmatched quality, perfectly balanced throughout the instruments entire range. Its motor and drive belts are completely enclosed within the beautifully finished wooden end cap of the instrument, providing both easy access to its top mounted controls and excellent protection from the elements. A new patented Adams fan system drives the fans directly from the side, and the instrument’s 12 volt motor runs from a completely safe 110 or 220 volt power adapter, totally eliminating the possibility of any electrical hazard. The motor speed is fully adjustable from 25 to 150 rpms and offers easily accessible switches allowing the player to choose whether the fans stop in the open or closed position. A newly advanced foot operated precision dampening mechanism offers full pedal tension, damper and height adjustments to allow each player to custom configure the instrument to their exact playing style.

CV-1F Concert Vibraphone
Field Frame with Motor
• Endurance Field Frame
• Aluminum Graduated Bars 57-38mm
• 40-140 RPM Motor
• 3 Octave Range F3-F6

  • Low End 35.6”
  • High End 22.4”
• Height Adjustment
  35.2” - -41.6”
• Weight 132lbs

The Adams accessory bar is completely square, providing a slip free mounting surface that will not creep or rotate even under extremely heavy loads. The Adams Endurance Field Frame is easily the most sturdy, best designed, highly adjustable frame on the market today.
Endurance Field Frame

All-Terrain Vehicle

The Endurance Frame was designed specifically with the demands of outdoor performance in mind, offering extra large locking precision wheels, and sturdy oversized tube construction. The Endurance Frame easily navigates rough, uneven outdoor terrain and still can be perfectly suited to indoor concert events as well. Both ends of the Endurance Frame feature the renowned Adams height adjustment system, allowing you to effortlessly adjust the playing height of the instrument to fit any size player.

Built to Accessorize

Front square accessory bar spanning the full length of the frame and square frame tubes allows the addition of drums, bells, cymbals, and virtually any instrument that can be mounted using a standard hardware mount. This creates a multi-instrument percussion set-up that can easily expand as your needs change.

Shown here is the FFAP-100 Endurance Field Frame Hardware Accessory Package.
4 PCX-200 Tilting Pipe Clamps, 2 CH-80 Cymbal Holders, S-100A Snare Drum Basket C-100AC Cymbal Holder

Highly portable table holds a variety of percussion effects at the ready. The add-on rack allows mounting of chimes, cowbells, triangles and even microphones. Collapses quickly for transportation. Available in 2 sizes, 12"x12" and 24"x18"
These synthetic Clave blocks are identical in size and available in 3 unique pitches and virtually indestructable. Includes adjustable holder for perfect placement.

QuickMount allows the player to play the instrument by hand or replace it in the holder quickly for stick playing.
Taiko drumming has spread around the World in recent years as more and more people are drawn to the power and excitement of this ancient art. Taiko literally means “fat drum” however there are many shapes and sizes of Taiko drums. Miya-daiko drums are large, deep temple drums with tacked heads while Hira-daiko are flat drums with tacked heads. The Shime-daiko are turnbuckle-tensioned drums similar to modern snare drums. Traditionally the larger drums were carved from a single large and very old tree which in turn made them extremely expensive and difficult for many Taiko groups to afford. Pearl’s new Taiko drums are made of compiled Oak that not only provides outstanding strength but makes them much more affordable than traditional carved models.
Pearl’s Taiko shells offer tremendous strength for the rigors of Taiko drumming. The inside of the shells are shaped with special reinforcements for optimum and balanced sound reflection within the drums and a special “A” grade calfskin. This ultra-thick natural hide is exclusive to Pearl’s Taiko drums and provides the deep resonating power of the Taiko sound. Pearl’s Taiko drums are made under strict supervision of Japanese traditional Taiko drum Masters to assure the highest quality and superior sound. An ancient art improved through modern innovation and craftsmanship.
